PROFESSIONAL SUMMARY

Detail-oriented frontend developer with hands-on experience building responsive and user-friendly web interfaces. Actively seeking a **Junior Frontend Developer** or **Frontend Developer Intern** role, **starting immediately**, to apply my skills and contribute meaningfully to real-world projects with a strong aspiration to grow as a developer. An adaptable team player with a strong commitment to problem-solving.

WORK EXPERIENCE

Frontend Developer Intern | *Digital Symphony*

Sep 2025 - Dec 2025

- Developed responsive lead generation microsites using **Tailwind CSS**, delivering clean and consistent UI across devices
- Built multi-page websites with reusable and scalable **Tailwind CSS** layouts
- Created a **React.js** lead generation microsite using reusable component-based architecture
- Designed an admin dashboard using **Bootstrap** with structured and consistent layouts
- Built a **WordPress** website using **Elementor**, integrating custom CSS and JavaScript via **WPCode**
- Followed **Agile (Scrum)** methodology to manage and deliver **sprint-based** projects efficiently

EDUCATION

Bachelor of Information Technology (Hons) | *City University Malaysia*

Sep 2022 - Dec 2025

(Completed coursework, certification pending)

CGPA: 3.78

Foundation in Information Technology | *City University Malaysia*

Sep 2021 - Sep 2022

SKILLS

Frontend: HTML, CSS, JavaScript

CSS Frameworks: Tailwind CSS, Bootstrap

Library: React.js

Content Management System (CMS): WordPress

Tools: Git, Visual Studio Code

PROJECTS

ResumeIQ – Conceptual AI Resume Optimization SaaS Marketing Landing Page

Tech Stack: React.js, React Hook Form, Tailwind CSS, Swiper.js, Framer Motion, Random User API

[Live Site](#) | [GitHub](#)

- Built a responsive SaaS marketing landing page with **React.js** and **Tailwind CSS** with reusable components and interactive UI sections. Integrated dynamic testimonials via **Random User API**, form validation with **React Hook Form**, and smooth animations using **Framer Motion** to enhance user experience.

Verbalify – Conceptual AI Language Learning SaaS Marketing Multi-Page Microsite

Tech Stack: React.js, React Router, React Hook Form, Tailwind CSS, Swiper.js, Framer Motion, Random User API

[Live Site](#) | [GitHub](#)

- Built a responsive multi-page SaaS marketing microsite with **React.js** and **React Router** for structured navigation. Implemented form validation with **React Hook Form**, a testimonial carousel using **Swiper.js** with dynamic user data from the **Random User API** and smooth UI animations using **Framer Motion**.

GlucoPredictor (Final Year Project) – Diabetes Risk Assessment System with Rule/AI-Based Health Tips Web Application.

Tech Stack: HTML, CSS, JavaScript, Bootstrap, PHP, MySQL, phpMyAdmin, Python, Jupyter Notebook

[GitHub](#)

- Built responsive user interface using **HTML**, **CSS**, **JavaScript**, and **Bootstrap**. Trained an **XGBoost** model in **Python** using **Jupyter Notebook** for predictions. Integrated AI-based health tips using **PHP** and **Python** backend. Implemented user authentication, bilingual support, and **MySQL** database management using **PHP** and **phpMyAdmin**.

Spice Haven – Conceptual Luxury Fine Dining Restaurant WordPress Website

Tech Stack: WordPress, Elementor (Page Builder), WPCode

[Live Site](#) | [GitHub](#)

- Built a fictional luxury fine dining restaurant website using **WordPress** and **Elementor**, enhanced with custom CSS and JavaScript via **WPCode**. Focused on premium UI design, responsive layouts, and modern branding.

AWARDS & ACHIEVEMENTS
